

Boil Water Advisory

Press Release 1

12 noon

January 3, 2018

- WBR Parish is experiencing low water pressure in areas across the parish due to the excessive demand as a result of residents running water in an attempt to avoid frozen water lines.
- Please turn all water faucets off when temperatures are above freezing in order for us to re-build water pressure throughout the system.
- During frozen temperatures we ask that residents that choose to run their faucets; please do so conservatively.
- **As a result of the low water pressure, a Boil Advisory has been issued for WBR Parish residents south of the Intracoastal Canal.**
- This BOIL ADVISORY will remain in effect until rescinded by the Water System
- ***If you did NOT experience low pressure or an outage, this does NOT pertain to you***
- All well sites and water infrastructure are functioning properly at this time; just having trouble keeping up with the excessive demand.
- Please visit www.wbrCouncil.org page or our Facebook page for more information on the boil advisory.
- West Baton Rouge Parish appreciates your cooperation in this matter
